

KADUNA STATE · WARD DEVELOPMENT COMMITTEE

WDC Coordinator

FOR THE LGA ALLIANCE COORDINATOR

The supervisory companion to the WDC Mobile app. Where the Secretary's app is field-first and individual, the Coordinator's app is institutional and oversight-first. One coordinator manages 8-15 wards in their LGA — reviewing submissions, approving or returning them with comments, chasing missing reports, and rolling everything up to State Leadership at cycle end.

Landscape

Two roles, one alliance

WARD SECRETARY

Field-first. Individual. Warm.

- **Goal:** file an honest monthly report, even offline.
- **Primary action:** capture, voice or type — whichever fits the moment.
- **Tone:** warm, encouraging. Big amber CTAs. Skeletons over spinners.
- **Surface area:** minimal. One decision per screen.
- **Audience reach:** their coordinator only.

LGA ALLIANCE COORDINATOR

Institutional. Multi-ward. Calm.

- **Goal:** read, review, approve or return reports across an LGA.
- **Primary action:** triage a queue, then act on each item with intent.
- **Tone:** calm authority. Aubergine bars. Status-first lists. Numbers on display.
- **Surface area:** richer — wards, reports, two-way messaging, state roll-up.
- **Audience reach:** downward to secretaries, upward to State Leadership.

Both apps share the same WDC design system — Kaduna aubergine, forest green for action, amber for attention, warm whites in place of clinical white. The Coordinator app spends its amber budget more sparingly, leans on aubergine for chrome, and uses status pills as a primary navigation aid.

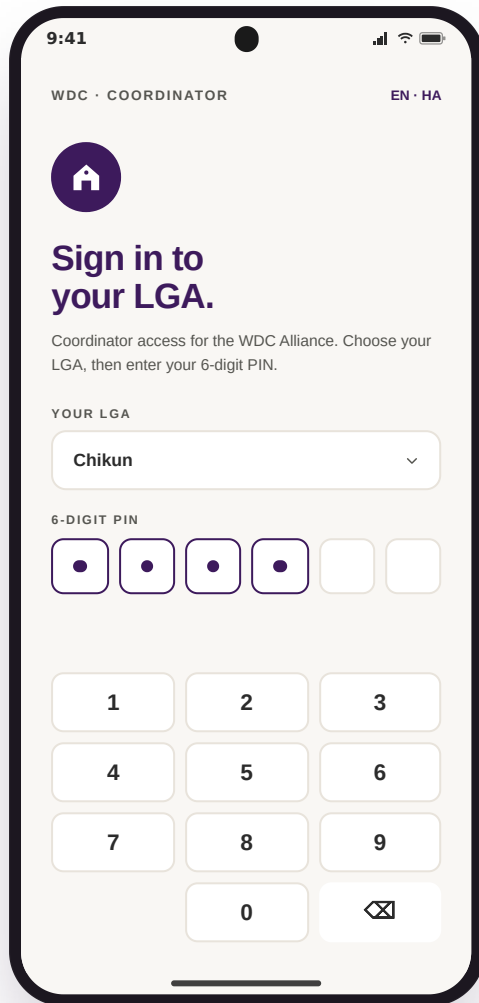

SIGN-IN

Quick, role-aware sign-in

Same zero-typing philosophy as the Secretary app — LGA + 6-digit PIN. Coordinators authenticate from any phone in their LGA without ever typing their name or email.

Sign-in

1.1 Coordinator sign-in

Same zero-typing pattern as the Secretary app, but ends at coordinator level. The user picks their LGA from one dropdown, then enters a 6-digit PIN — slightly longer than the secretary's 4-digit PIN to reflect the higher-trust role. Hausa toggle is always one tap away in the corner.

LGA + 6-DIGIT PIN

OVERVIEW

A whole LGA at a glance

The home screen exists to answer one question fast: which wards need attention this cycle?
Snapshot up top, attention queue in the middle, action shortcuts at the bottom.

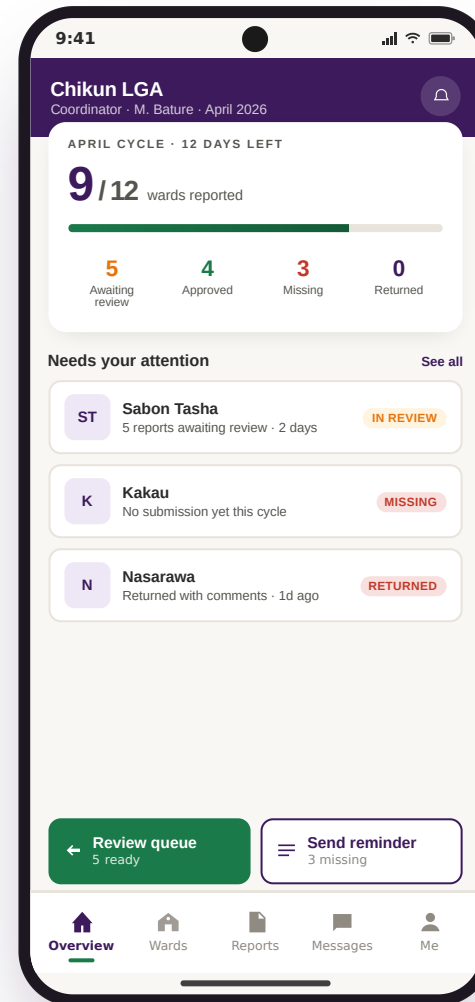

Overview · LGA dashboard

2.1 LGA overview dashboard

The first thing the coordinator sees. Aubergine top bar carries the LGA name, the cycle, and the user. A snapshot card overlays the bar with a 9-of-12 wards-reported headline, a progress bar, and four counters — Awaiting review, Approved, Missing, Returned. Below: an attention queue of three wards needing action right now.

HOME · WARD ROLL-UP

2.2 Quick actions

The same dashboard scrolled to its action row. Two stacked CTAs — Review queue (forest green, primary) and Send reminder (purple outline) — surface the two most common coordinator tasks without requiring tab navigation. Numbers are live: "5 ready" and "3 missing".

HOME · ACTION SHORTCUTS

3

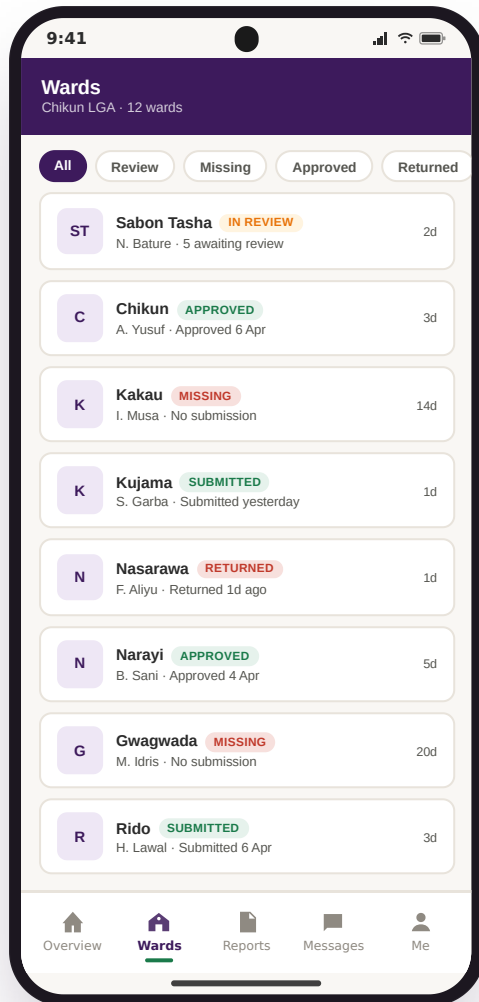

WARDS

Manage every ward in your LGA

Twelve wards rarely move at the same speed. Status-first lists and per-ward detail let the coordinator triage and follow-up without hunting through reports first.

3 · WARDS

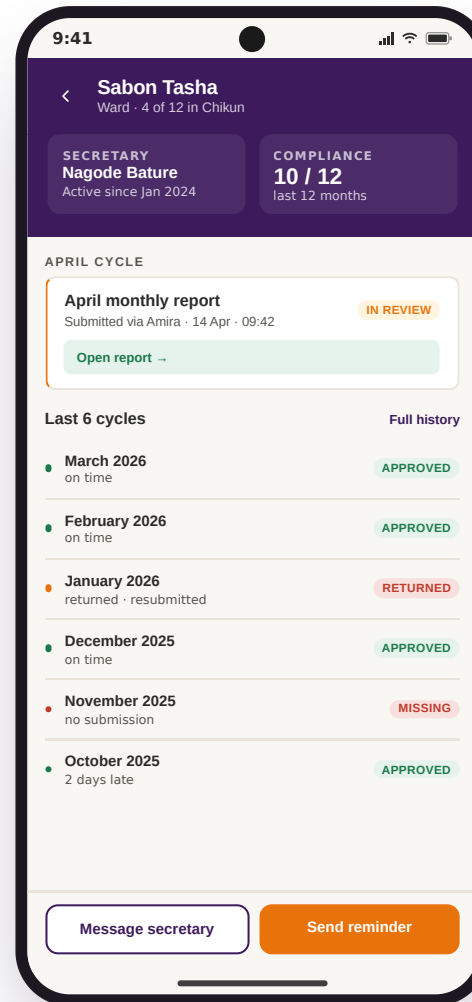

Wards · List & detail

3.1 Wards · Management list

All wards in the LGA in a single status-first list. Each row shows the ward, secretary, status badge, and last-reported relative time. Filter chips above (All, Review, Missing, Approved, Returned) let the coordinator narrow the list to whatever they're hunting for.

LIST · FILTERABLE

3.2 Ward · Detail view

Single ward drilled down. Two tiles in the aubergine band: the secretary's name and tenure on the left, the 12-month compliance ratio on the right. The current cycle's submission card shows status with a one-tap path to the report. A tidy 6-cycle history sits below.

DETAIL · 6-CYCLE HISTORY

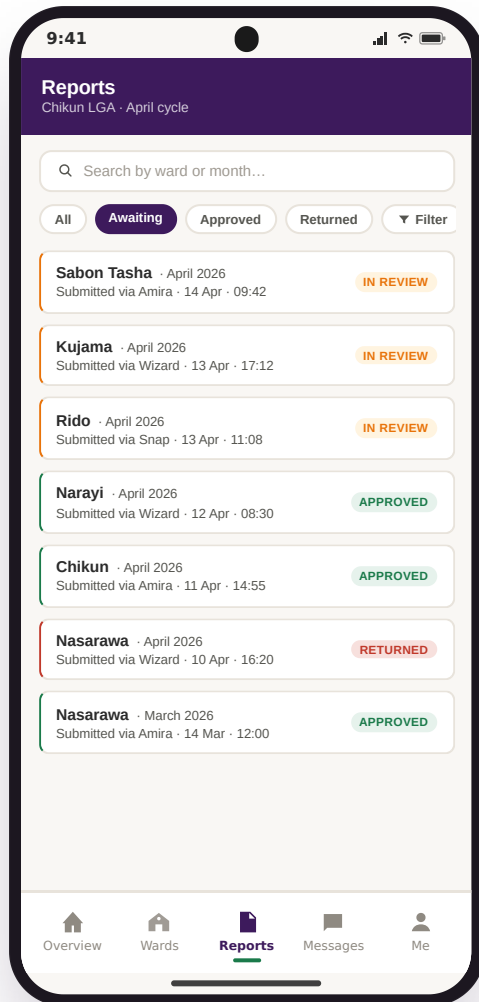

4

REPORTS

Review the work that comes in

A queue you can filter, search and sort. Each report opens to a structured review screen so the coordinator can comment per section instead of writing one long blanket note.

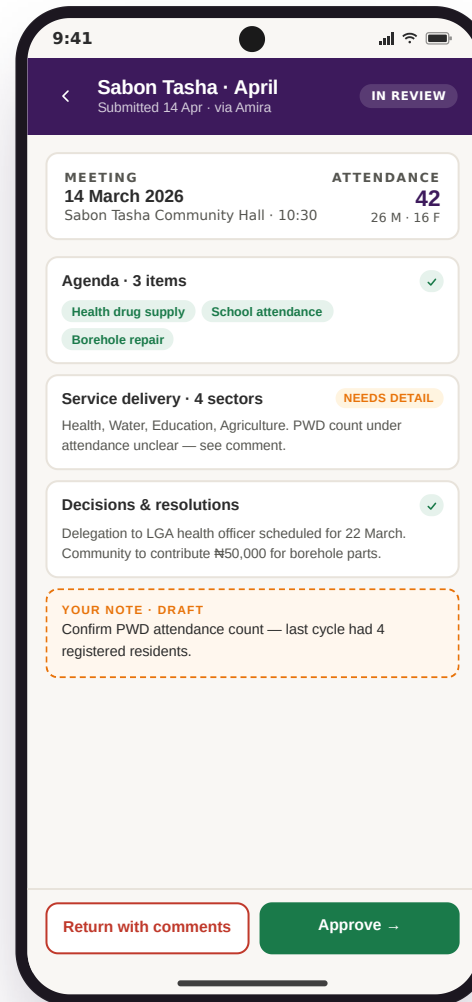

Reports • Queue & review

4.1 Reports • LGA queue

Every submission across the LGA in one place, sortable and filterable. Each row carries a coloured left edge — amber awaiting, green approved, red returned — so the queue is scannable at a glance. Submission method (Amira, Wizard, Snap) is preserved as metadata.

QUEUE • SEARCHABLE

4.2 Report • Review

A single report opened for review. Meeting header card up top with the date and attendance breakdown. Each section gets its own card; tick marks indicate clean sections, amber pills flag sections needing detail. A draft note panel previews what the secretary will see if returned.

DETAIL • SECTION COMMENTS

5

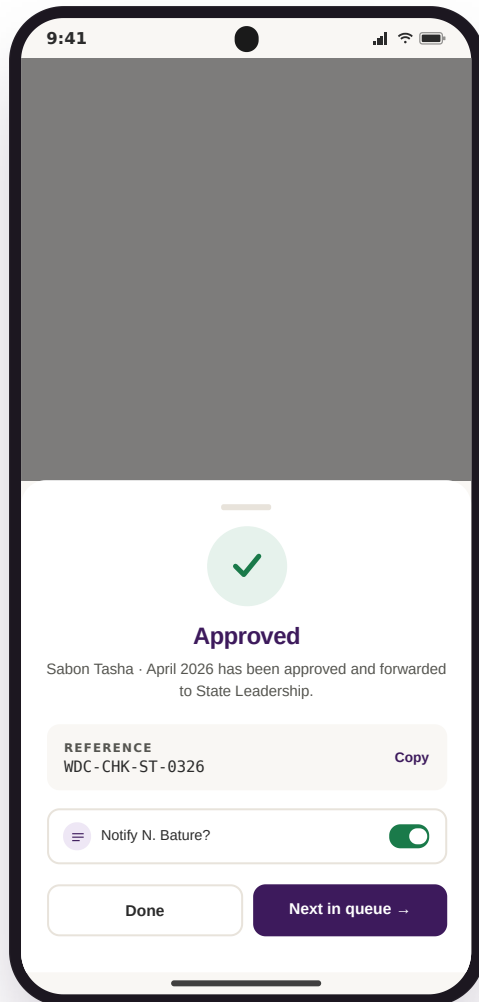

DECISIONS

Approve or return — with care

Two clean outcomes. Approving forwards the report up to State automatically; returning routes it back to the secretary with section-level flags and a coordinator note.

5 · DECISIONS

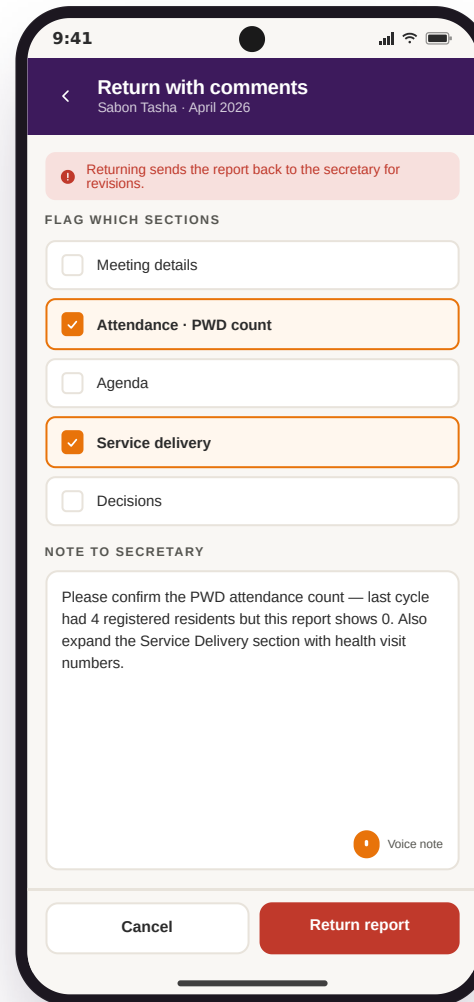

Approve & return

5.1 Approved · Confirmation

Bottom sheet that appears when the green Approve button is tapped. Confirms the action, shows the unique reference (WDC-CHK-ST-0326), offers a toggle to notify the secretary, and presents two paths forward: Done, or jump straight to the next item in the review queue.

MODAL · FORWARD TO STATE

5.2 Return · With comments

The other side of the decision. Section-level checkboxes flag exactly which parts need rework. A composer below holds the coordinator's note — text, with an optional voice note for low-literacy comfort. Red Return button at the bottom; cancellation always available.

COMPOSER · SECTION FLAGS

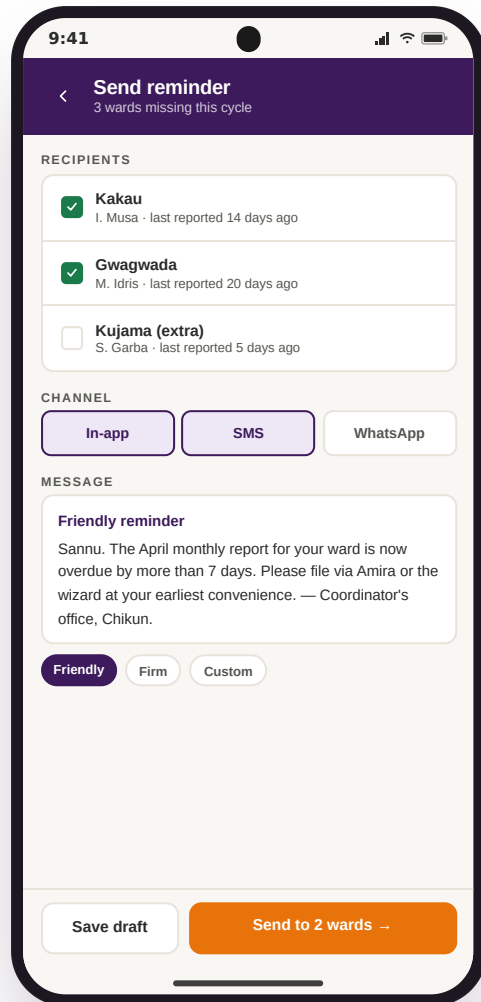

6

REMINDERS

Chase the missing — kindly

A bulk reminder composer with tone presets and multi-channel delivery. Designed for the reality that most chasing happens by SMS or WhatsApp, not in-app.

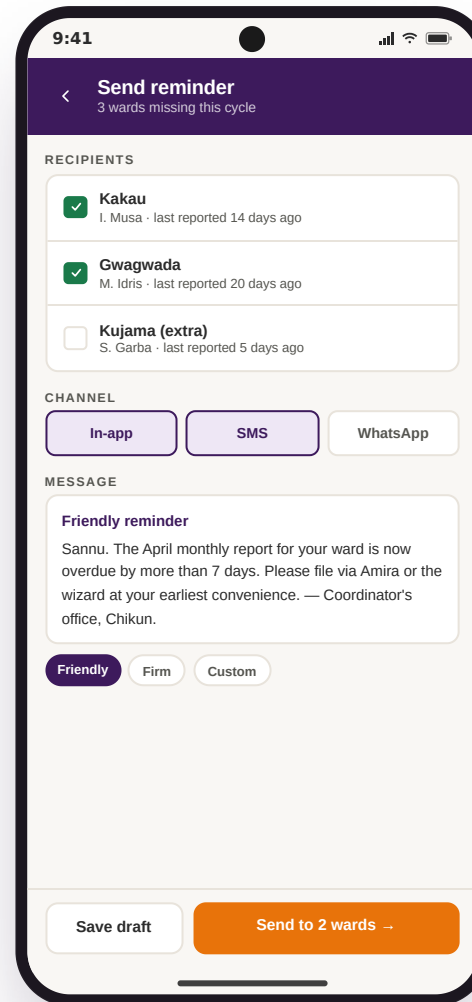

Send reminder • Composer

6.1 Send reminder • Bulk

Composer for the most common chase: prompting wards that haven't submitted yet. Pre-selects the wards that are currently missing, with checkboxes to add or remove. Three channels (In-app, SMS, WhatsApp) — In-app and SMS on by default; WhatsApp opt-in per coordinator preference.

BULK • MULTI-CHANNEL

6.2 Send reminder • Tone & template

Same screen, scrolled. Three tone presets — Friendly, Firm, Custom — let the coordinator pick the right register without writing from scratch. The template uses Sannu (Hausa for "hello") in both languages because it's how the LGA actually opens correspondence. Recipient count flows into the send button.

tone • FRIENDLY / FIRM / CUSTOM

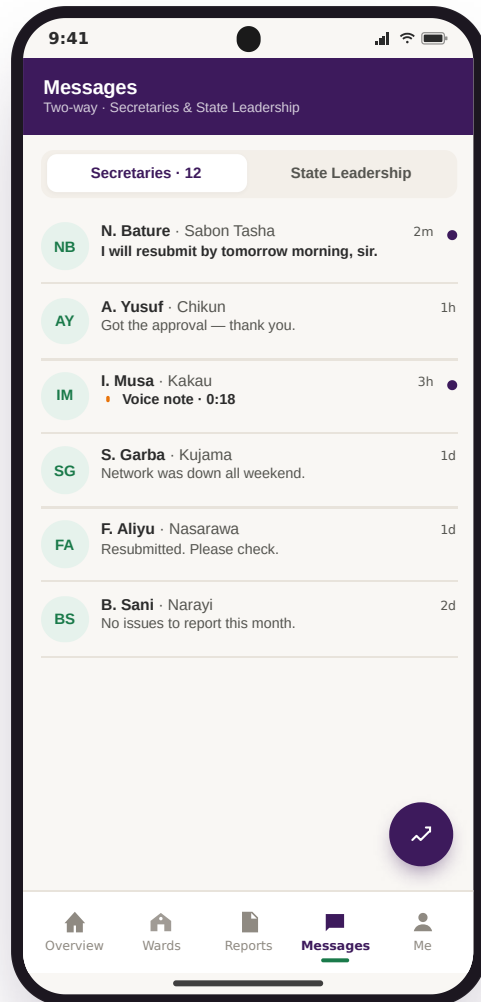

7

COMMUNICATION

Two-way, two audiences

Coordinators talk down to secretaries and up to State Leadership. The interface keeps those two flows separate so a message never lands with the wrong audience.

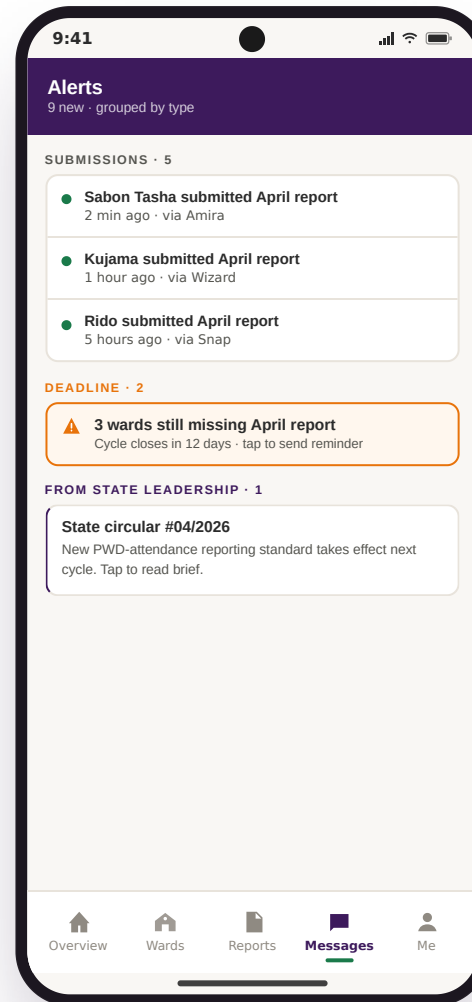

Messages & alerts

7.1 Messages · Two recipient groups

Coordinator messaging splits cleanly into two lanes — Secretaries (downward, named per ward) and State Leadership (upward, named per region). The segmented control sits at the top so the coordinator never has to wonder which audience they're writing to.

THREADS · SEGMENTED AUDIENCE

7.2 Alerts · Coordinator-grade

Notifications grouped by type rather than chronologically — Submissions, Deadlines, From State Leadership. Each group uses its own colour treatment so the coordinator can triage in a glance. Deadline group sits in an amber-tinted card; State circulars get a purple accent.

GROUPED · TRIAGE-FIRST

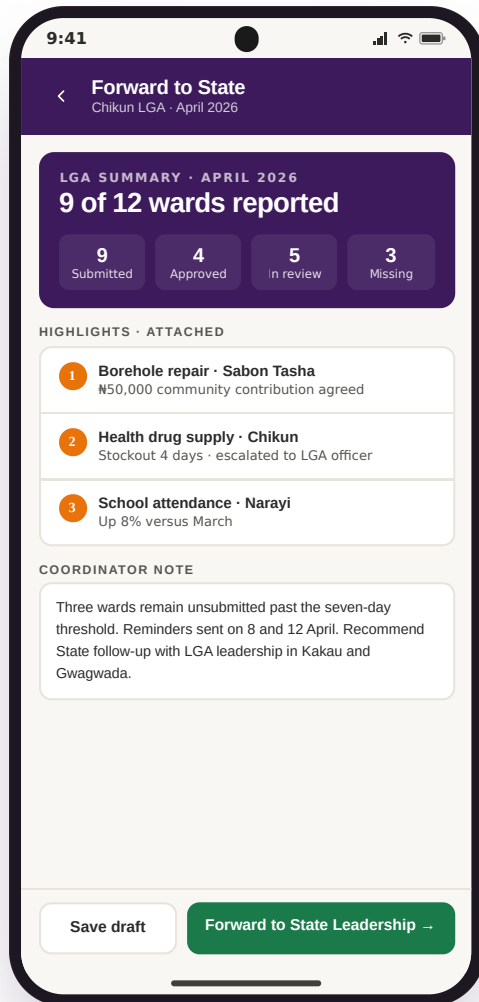

8

FORWARD TO STATE

Close the cycle, hand it up

At cycle end, the coordinator packages a summary for State Leadership — headline numbers, highlights, and a short note. State sees the same structure across all 23 LGAs.

Forward to State

8.1 Forward · LGA roll-up

Once the cycle closes, the coordinator forwards their LGA summary up to State Leadership. Aubergine summary card with the headline number; a numbered Highlights list capturing what's notable; a free-form coordinator note for context that numbers can't carry.

CYCLE CLOSE · UP TO STATE

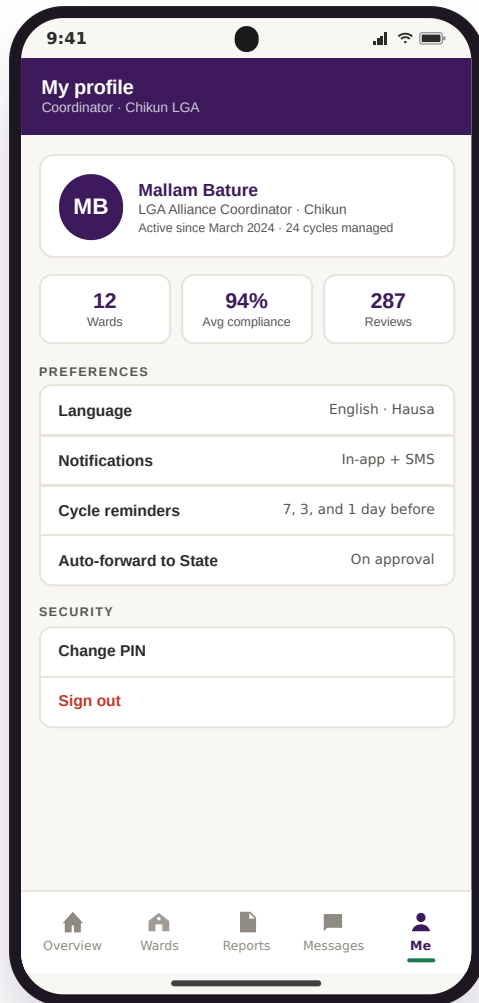

PROFILE

Quietly configurable

Account settings, language, notification cadence, and security. Designed to recede — the coordinator visits this screen monthly, not daily.

Profile

9.1 My profile & preferences

Coordinator profile card with role and tenure on top, then three stats — Wards, Average compliance, total Reviews. Below: preferences (Language, Notifications, Cycle reminders, Auto-forward) and Security (Change PIN, Sign out). Calm, restrained — settings rarely need decoration.

ACCOUNT · PREFERENCES
