

KADUNA STATE · WARD DEVELOPMENT COMMITTEE

Screen Walkthrough

A close-up tour of the WDC Mobile app for Ward Development Committee Secretaries across all 23 LGAs of Kaduna State. Two phone screens per page, each with a short caption explaining what it does and why it looks the way it does.

Landscape

1

ENTRY

First launch & zero-typing login

Kaduna State crest over deep aubergine, a 3-slide carousel framing the three core promises — offline-first, snap-to-fill, status tracking — and a no-email, no-password login: LGA → Ward → PIN.

Splash & onboarding

1.1 Splash

Brand entry. Deep aubergine gradient with the Kaduna State crest, the green WDC logo, and the tagline "Your ward. Your data. Your impact." Auto-advances after ~1.8s into the onboarding carousel or login.

~1.8S • AUTO-ADVANCE

1.2a Onboarding • 1/3

"Report, even without internet." First slide of three. Sets the offline-first promise — work is saved on the device and syncs when connectivity returns. Skip link visible top right at all times.

SLIDE 1 OF 3

Onboarding continues

1.2b Onboarding · 2/3

"Snap your written report."
Introduces the OCR path. If the report is already on paper, the secretary can photograph it and the app fills the form for them.

SLIDE 2 OF 3

1.2c Onboarding · 3/3

"Track every submission." Closes the loop — see review status, chat with coordinators, and know where each report stands. Amber Get Started button graduates the user into login.

SLIDE 3 OF 3

Zero-typing login

1.3 Login · Select LGA

Step 1 of zero-typing login. The secretary taps their Local Government Area from a search-filtered list of all 23 LGAs in Kaduna State. Hausa toggle is always available in the header.

STEP 1 OF 3 · NO TYPING

1.4 Login · Select Ward

Step 2. Wards belonging to the chosen LGA appear as large tap targets. Breadcrumb at top shows the LGA already picked, with a back arrow to revise.

STEP 2 OF 3

PIN entry

1.5 Login · PIN entry

Step 3. A 4-digit PIN is the only thing the secretary types. Identity breadcrumb (LGA · Ward) sits above the keypad to confirm context. Forgot PIN routes to a coordinator-assisted reset.

STEP 3 OF 3 · 4-DIGIT PIN

HOME

Two dashboard directions

Variant A leans warm and community-feeling. Variant B is data-dense and institutional. Dark mode showcased as a third tonality of the same information architecture.

Two dashboard variants

2.1 Dashboard · Variant A · Warm stacked

Community-feeling layout. Greeting, ward name, and an offline pill sit at top. Large forest-green Submit New Report CTA. Recent activity stack below shows last three reports with status badges.

DEFAULT · LIGHT MODE

2.2 Dashboard · Variant B · Data-dense

Institutional layout. 91% on-time rate headline, 12-month compliance heatmap, and split CTAs (Snap report / Fill form). For coordinators or secretaries who manage multiple wards.

ALTERNATE · LIGHT MODE

Dark mode

2.3 Dashboard · Dark mode

Same Variant B information architecture in dark mode. Aubergine headers persist; surfaces darken to soft charcoal. Optimised for low-light field environments and OLED battery.

DARK MODE

3

SNAP & UPLOAD

OCR as an optional path, not a gimmick

If the report is already on paper, the secretary photographs it. Edge detection, on-device extraction, and a reviewable form with per-field confidence markers. Coordinators see the same scanned tag during review — full transparency.

Capture & extract

3.1 Snap · Camera capture

Live camera with green edge-detection overlay. The user is told to hold steady; auto-capture fires when the document is in frame and well-lit. Manual shutter and gallery import as fallbacks.

STEP 1 · CAPTURE

3.2 Snap · OCR processing

On-device extraction. A short, honest progress indicator ("Reading your report · Working offline · No data sent") plus a checklist of fields detected so far — meeting date, attendance, agenda items, decisions.

STEP 2 · EXTRACT

Review & verify

9:41

< **Review scanned report**

+ **AGENDA ITEMS (3)** · Auto-filled
Health drugs · School attendance · Borehole repair

i Your document is used only to fill this form and is deleted after processing.

Continue to Review →

3.3 Snap · Review extracted

Pre-filled form. Each scanned field carries an amber tint and ✦ tag — the secretary can tap to confirm or edit. Confidence markers (HIGH / MED / LOW) flag fields the OCR is least sure about.

STEP 3 · REVIEW

9:41

✕ **Original Document**

WDC MONTHLY REPORT
Sabon Tasha Ward · March 2026

Meeting Date: 14 March 2026
Venue: Sabon Tasha Community Hall
Attendees: 42 (M: 26, F: 16)
Youth attendance: 8
PWD attendance: _____

Agenda Items:

1. Health facility drug supply
2. School attendance review
3. Water borehole repair

Decisions: Delegation scheduled for 22 March with LGA health officer.
Community to contribute N50,000 for borehole repair parts.

Pinch to zoom **Back to form →**

3.4 Snap · View original document

The captured photograph remains viewable from the review screen. Pinch to zoom in, swipe between pages. Coordinators see the same document attached to the submission for full transparency.

ALWAYS-AVAILABLE REFERENCE

4

REPORT WIZARD

Five-step form — the alternate path

For secretaries who prefer typing. Steppers instead of keyboards for counts. Offline banner never hidden. Same review and success screens as the Amira conversation flow.

Meeting & attendance

Submit Report

Save as draft

4.5 Wizard · Review & submit

Final summary. Every section can be tapped to jump back and edit. Submit button shows queued state if offline — the report waits and uploads as soon as connectivity returns.

STEP 5 OF 5

AI CONVERSATION

Amira asks. You answer.

The primary path for filing a monthly report. A warm, Nigerian-accented AI assistant guides the secretary through the form one question at a time — fully functional offline.

Meet Amira & start talking

A.1 Amira · Meet your assistant

Pre-conversation screen. Warm Nigerian-accented voice avatar, a short reassurance ("I'll ask you simple questions, just speak your answers."), and an explicit note that voice quality is preserved offline.

PRE-FLIGHT

A.2 Amira · In conversation · listening

Active conversation. Amira's questions are left-aligned in soft white bubbles; transcribed answers appear right-aligned in green. Amber mic pulses while recording. Tap to interrupt.

ONLINE · VOICE + TRANSCRIPT

Online & offline conversation

A.3 Amira · In conversation · offline

Same conversation, fully offline. The offline banner is honest and persistent. Voice transcription happens on-device; answers stage locally until the next sync.

OFFLINE · LOCALLY CACHED

A.4 Amira · Review & confirm

After the conversation, Amira presents what she heard as a structured summary. Sections expand for inline edits; a Replay button re-plays Amira's last clarification audio.

PRE-SUBMIT

A · AI CONVERSATION

Review & success

A.5 Amira · Submitted

Success screen. Green check, ward name, secretary name, and a unique reference (WDC-KDN-2604-9713). Same look used by the wizard so success feels consistent across paths.

CONFIRMATION

MULTILINGUAL

A Hausa wajen Hausawa.

Hausa is not a translation layer bolted on at the end — it is a first-class locale. Every screen, every voice prompt, every notification has a Hausa equivalent reviewed by native speakers in Kaduna State. The toggle lives one tap deep.

Splash & onboarding · Hausa

H.1 Splash · Hausa

Same brand entry, Hausa wordmark. "Unguwarka. Bayananka. Tasirinka." — Your ward, your data, your impact. The same aubergine, same green WDC logo; only the language layer changes.

HAUSA LOCALE · SPLASH

H.2 Onboarding · Hausa

"Aika rahoto, koda babu intanit." — Send a report, even without internet. The amber Ci gaba (Continue) button keeps the same shape and weight as English so muscle memory carries across both languages.

HAUSA LOCALE · ONBOARDING 1/3

Dashboard & conversation · Hausa

H.3 Dashboard · Hausa

Variant B dashboard fully translated. "Babu intanit · 2 rahotoni a layi" — Offline · 2 reports queued. Numerals stay Western Arabic for shared legibility, but every label, sector name, and CTA is Hausa.

HAUSA LOCALE · DASHBOARD B

H.4 Amira · Hausa conversation

Amira speaks Northern Nigerian Hausa with a female voice.

Question: "Yaushe aka yi taron unguwarka a watan nan?"

Answer transcript: "Mun yi taron ranar 14 ga Marish." The mic prompt reads "Ina jin ka..." — I am hearing you.

HAUSA LOCALE · VOICE + TRANSCRIPT

Language settings

H.5 Settings · Language

The language switch lives in Settings as a clear two-row chooser, not buried in a menu. Hausa selected here; English a single tap away. Below it: Amira voice profile (Northern · Female · 1.0x speed) so users can tune the assistant to a familiar accent.

ACCOUNT · LANGUAGE TOGGLE

5

AFTER SUBMISSION

Track, message, stay informed

Status-first listing with coordinator comments surfaced inline. Chat with read receipts. Grouped alerts use colour and shape so urgent items stand out even in monochrome.

Reports & detail

5.1 My reports

Status-first list. Each row leads with a coloured status badge (Submitted, Reviewed, Flagged, Queued) so the secretary can scan a month at a glance.

LIST · STATUS-FIRST

5.2 Report detail

Single report drilled down. Coordinator comments inline with the report sections they refer to — no jumping to a separate thread to understand what was flagged.

DETAIL · INLINE COMMENTS

Messages & alerts

5.3 Messages

Two-way chat with coordinators. Double-tick read receipts, voice notes for low-literacy comfort, and inline references to specific reports.

CHAT · PER-COORDINATOR
THREADS

5.4 Alerts

Grouped notifications: report status changes, coordinator messages, system notices. Colour and shape together signal urgency so the page works even in monochrome.

GROUPED · COLOUR + SHAPE

Settings

5.5 Settings

Language toggle (English / Hausa), data usage controls, PIN reset, and a link to local support. Keeps the surface area small — the app is mostly meant to recede.

ACCOUNT · PREFERENCES

Empty, loading, error — never a dead end

Loading uses skeletons, not spinners. Error screens offer both Try again and Continue offline because the internet is the exception, not the rule.

Empty & loading

6.1 System · Empty state

No reports yet. Friendly illustration, a one-line nudge ("Your first report starts here"), and a primary green CTA. Empty states never feel like dead ends.

FIRST-RUN · NO DATA

6.2 System · Loading skeleton

Skeletons, not spinners. Rough shapes of the rows that are coming. Communicates structure even before data arrives, and avoids the nervous "is it stuck?" feeling of a spinner.

PENDING · NETWORK OR DB

Error recovery

6.3 System · Error state

Honest error copy plus two routes forward — Try again and Continue offline. Because for these users the internet is the exception, not the rule.

FAILURE · RECOVERABLE
