

KADUNA STATE · WARD DEVELOPMENT COMMITTEE

WDC State Console

FOR THE STATE ALLIANCE DIRECTOR

The strategic oversight surface for the WDC programme across all 23 LGAs of Kaduna State. Where the Secretary's app captures field reality and the Coordinator's app reviews ward-by-ward, the State Console sits above both — monitoring statewide patterns, publishing forms, managing the people layer, opening investigations, and consulting the AI Assistant for decision-support. Designed for desktop because state-level work needs density, two-monitor workflows, and serious data tables.

15

Screens · One per page

11

Sections

1440 × 900

Desktop canvas

Three roles, one alliance

WARD SECRETARY

Field-first. Mobile.

- **Goal:** file an honest monthly report, even offline.
- **Surface:** Phone. Voice, OCR, or 5-step wizard.
- **Tone:** warm, encouraging.
- **Reach:** their LGA Coordinator.
- **Volume:** 1 ward · 1 report per cycle.

LGA ALLIANCE COORDINATOR

Supervisory. Mobile.

- **Goal:** review and approve reports across an LGA.
- **Surface:** Phone. Status-first lists, queue triage.
- **Tone:** calm authority.
- **Reach:** down to secretaries, up to State.
- **Volume:** 8–25 wards × monthly cycles.

STATE ALLIANCE DIRECTOR

Strategic. Desktop.

- **Goal:** oversee, govern, decide, and intervene.
- **Surface:** Desktop console with sidebar nav.
- **Tone:** institutional · audit-aware.
- **Reach:** all 23 LGAs · 255 wards · the AI assistant.
- **Volume:** entire state × indefinite history.

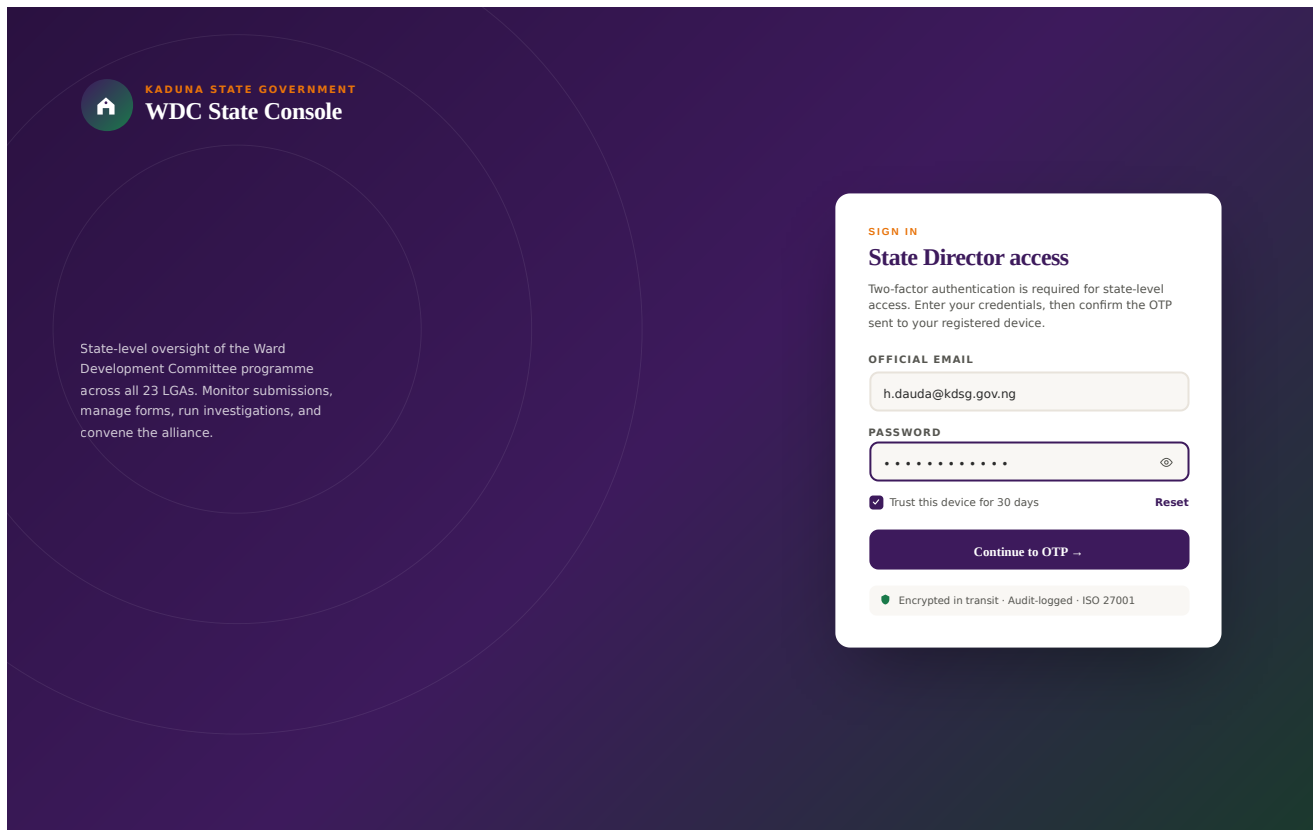

All three apps share the WDC design system — Kaduna aubergine, forest green for action, amber for attention, warm whites in place of clinical white. The State Console adapts that palette for desktop density: an aubergine sidebar replaces the bottom tab bar, KPI tiles replace stat strips, full data tables replace card stacks, and AI Insights move from a hidden menu item to a first-class panel on the home screen.

ACCESS

Audited, two-factor, role-aware sign-in

State-level access is the most consequential authentication tier in the platform. Every attempt — successful or failed — is logged, and the OTP step is non-negotiable.

**0.1 Sign-in · 2FA**

Director access begins with email + password and confirms via OTP. Sign-in is audit-logged on every attempt — successful or not — and the right rail confirms the security posture (encrypted in transit, ISO 27001).

KEY ELEMENTS

- Two-factor authentication required
- Trust-this-device option (30 days)
- Branded gradient with Kaduna State signature
- Failed attempts surface in the audit log immediately

SIGN-IN · OTP FOLLOWS

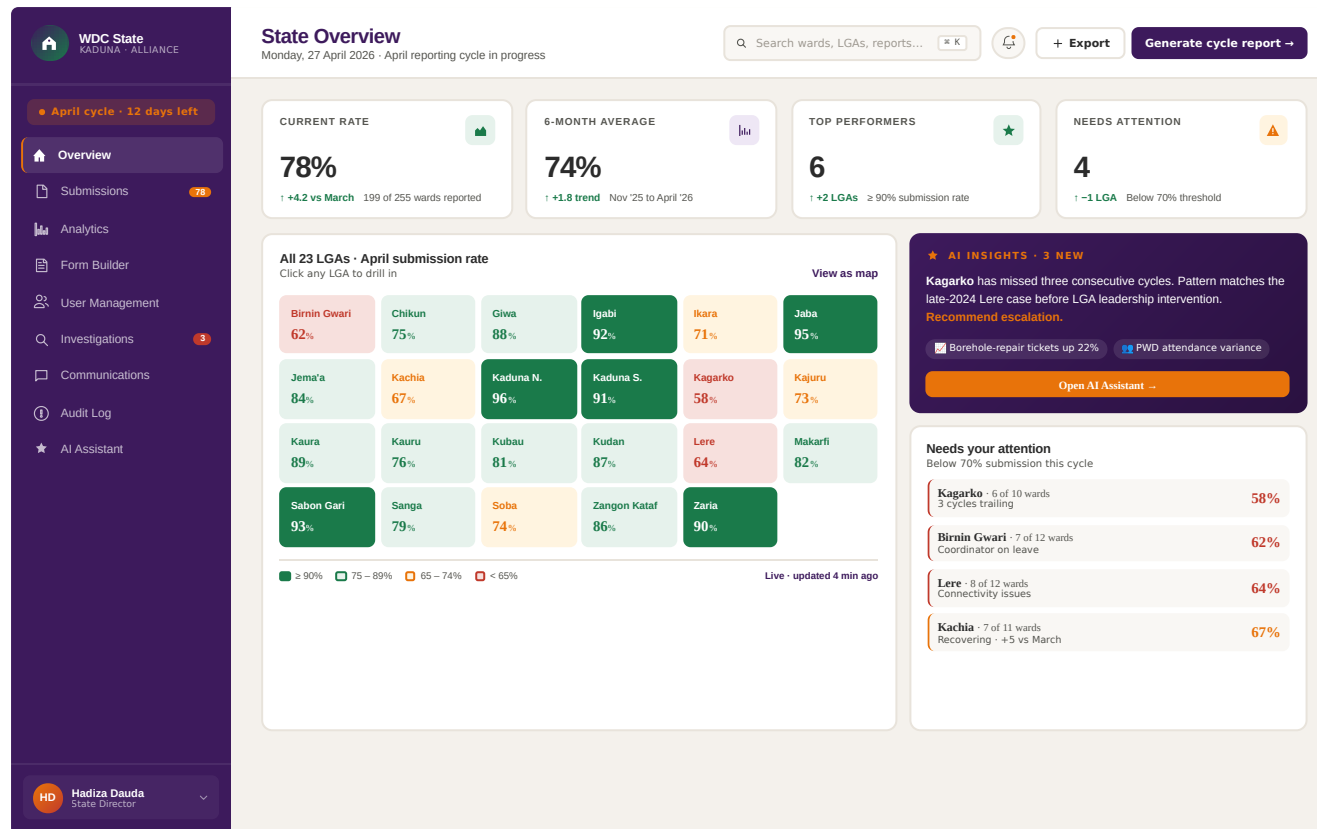

OVERVIEW

Strategic command, at a glance

The Overview screen is built to answer one question fast: what needs my attention this cycle? KPI tiles, an LGA heatmap, AI-surfaced insights, and a triaged needs-attention list — all without scrolling.

Strategic dashboard

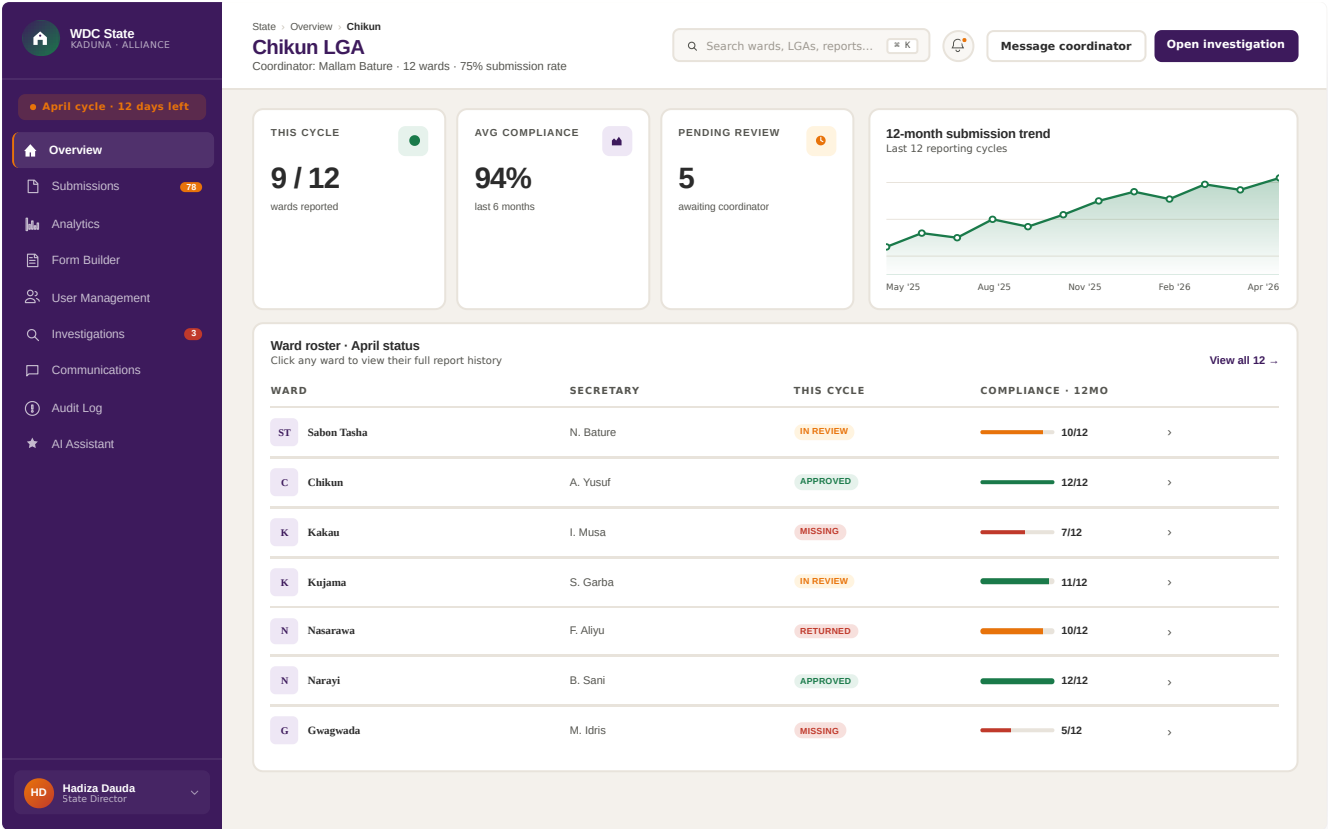

1.1 State Overview · Strategic dashboard

The first thing the Director sees. Four KPI tiles up top — current rate, six-month average, top performers, and LGAs needing attention — each with a directional delta versus the prior cycle. Below, a heatmap of all 23 LGAs colour-coded by April submission rate, paired with an AI Insights card and a triaged "Needs your attention" list. Everything on one screen, no scrolling.

KEY ELEMENTS

- Four-up KPI strip with cycle-over-cycle deltas
- 23-LGA heatmap with one-click drill-down
- AI Insights surfaced above the fold (not buried in a menu)
- Needs-attention list pre-sorted by risk
- Generate cycle report CTA up top

HOME · DECISION COMMAND CENTER

1.2 LGA drill-down · Chikun

Click any LGA on the heatmap and you land here — the Director's view of one LGA. KPIs scoped to the LGA, a 12-month trendline showing the trajectory, then the ward roster as a table with status pills, secretary names, and individual compliance ratios so any anomalies are immediately visible.

KEY ELEMENTS

- Breadcrumbs maintain context (State > Overview > Chikun)
- Two-column KPI + trendline header for at-a-glance read
- Ward roster with inline compliance bars
- Direct actions: message coordinator, open investigation

DRILL-DOWN · ONE LGA IN FOCUS

2

SUBMISSIONS

Every ward, every cycle, in one queue

A statewide queue of 255 wards × monthly cycles is a lot of rows. The Submissions screen makes that volume tractable through search, filters, and method-aware pills that read fast at scale.

☐ Kakau	Chikun	I. Musa	—	Not yet	MISSING

2.1 Submissions · Statewide queue

All 255 wards in one filterable, searchable table. KPI strip at top tallies the cycle — total submitted, awaiting review, approved, returned. Every row carries the ward, LGA, secretary, submission method (Amira / Wizard / Snap), timestamp, and status; the reference ID is exposed in monospace for cross-referencing.

KEY ELEMENTS

- Full-text search by ward, LGA, secretary, or reference
- Filter chips: LGA, status, cycle, submission method
- Method pills colour-coded for fast scanning
- Bulk-select via row checkboxes for batch actions
- CSV export for offline analysis

OPERATIONAL · AUDIT-GRADE TABLE

3

FORM BUILDER

The platform is what the State publishes

Forms drive what gets reported and how. The State Director controls form lifecycle — Draft, Deployed, Archived — and edits in a three-pane editor that shows exactly what secretaries will see.

The screenshot displays the 'Form Builder' library within the 'WDC State KADUNA · ALLIANCE' console. The interface is divided into a dark purple sidebar on the left and a main content area. The sidebar contains navigation links: Overview, Submissions (78), Analytics, Form Builder (selected), User Management, Investigations (3), Communications, Audit Log, and AI Assistant. The main content area has a header with 'State · Form Builder', 'Form Builder' title, and a subtitle 'Design and deploy report forms across all 23 LGAs'. It includes a search bar, a notification bell, and a '+ New Form' button. Below the header, there are tabs for 'Deployed' (4), 'Draft' (2), and 'Archived' (11). The main area displays four form cards, each with a title, version, scope, submission count, last edit time, and a 'LIVE' status indicator. Each card has 'Edit', 'Preview', and 'View submissions' buttons.

Form Name	Version	Scope	Submissions	Last Edited	Status
Monthly Ward Report · Standard	v4.2	36 fields - scoped to All 23	199 this cycle	2 days ago	LIVE
PWD Attendance Supplement	v1.0	6 fields - scoped to All 23	98 this cycle	1 week ago	LIVE
Quarterly Service Delivery · Health	v2.1	24 fields - scoped to 23 LGAs	245 this quarter	3 weeks ago	LIVE
Borehole & Water Infrastructure	v1.3	18 fields - scoped to 12 LGAs	106 this cycle	1 month ago	LIVE

3.1 Form Builder · Library

Every form deployed across the state, sorted into Deployed, Draft, and Archived tabs. Each card surfaces version, field count, deployment scope, current cycle's submission count, and last-edit time — enough to know whether a form is healthy without opening it.

KEY ELEMENTS

- Three-state lifecycle: Deployed / Draft / Archived
- Live submission counts per form
- Per-form scope (state-wide, specific LGAs, or pilot)
- Edit, Preview, and View Submissions in one row

3.2 Form Builder · Editor

Three-column editor. Field palette on the left (text, number, stepper, photo, voice note, conditional, etc.), live form canvas in the middle showing exactly what the secretary will see, and a properties panel on the right for the selected field. Hausa labels are a first-class field property, not a translation afterthought.

KEY ELEMENTS

- Drag-and-drop field palette with 12 input types
- Live preview canvas — what you see is what the secretary sees
- Per-field properties: required, voice input, validation, Hausa label
- Section-level grouping with collapsible headings
- Save draft, Preview, or Deploy directly from the top bar

4.1 User Management · LGA tree

A hierarchical view of every user in the alliance. Each LGA expands to show its wards and secretaries; coordinators sit at the LGA level. Status pills, compliance percentages, and active-since dates make the operational health of the people layer visible at a glance.

KEY ELEMENTS

- 23 LGAs → 255 wards → secretaries · expandable tree
- Coordinator card per LGA with avatar and tenure
- Unassigned wards flagged in red with one-click assign
- Search across LGA, ward, coordinator, or secretary
- Bulk CSV import for state-wide onboarding waves

HIERARCHY · ASSIGNABLE

WDC State Console · Kaduna State

Screen-by-screen walkthrough

Assign Secretary

The screenshot displays the 'WDC State KADUNA · ALLIANCE' console. The left sidebar contains navigation links: Overview, Submissions (78), Analytics, Form Builder, User Management (active), Investigations (3), Communications, Audit Log, and AI Assistant. The main header shows 'State · User Management' and 'User Management' with a subtitle 'Manage LGA Coordinators and WDC Secretaries across all 23 LGAs'. A search bar and a user profile icon are in the top right. The modal 'Assign WDC Secretary' is centered, showing details for 'Kakau ward · Chikun LGA · vacant since 8 March 2026'. The form fields include: 'FULL NAME' (Ibrahim Musa Kakau), 'PHONE NUMBER' (+234 806 234 1198), 'GENDER' (Male), and 'PREFERRED LANGUAGE' (Hausa). A toggle for 'Auto-generate 4-digit PIN' is turned on. A notification states: 'Coordinator **Mallam Bature** (Chikun) will be notified once the secretary signs in.' The modal has 'Cancel' and 'Assign secretary →' buttons.

The secretary will receive their PIN and welcome SMS at this number.

GENDER
Male

PREFERRED LANGUAGE
Hausa

Auto-generate 4-digit PIN
Recommended. The secretary changes it on first sign-in.

Coordinator **Mallam Bature** (Chikun) will be notified once the secretary signs in.

Cancel Assign secretary →

4.2 User Management · Assign Secretary

A focused modal for the most consequential people-action: putting a new secretary into a vacant ward. Full name, phone (which doubles as their identifier and PIN-delivery channel), gender, preferred language, and an auto-generate-PIN toggle. The relevant coordinator is auto-notified once the secretary signs in for the first time.

KEY ELEMENTS

- Phone number is the identifier — no email required
- Auto-generate 4-digit PIN, secretary changes on first sign-in
- Hausa as a first-class language preference
- Coordinator auto-notified on first sign-in
- Audit-logged with full actor + target + result

A single case opened. Status banner up top with the headline finding. Three KPI tiles scoped to the case (current submission rate, cycles trailing, days open). The right rail holds metadata; the main column shows a chronological activity log — investigation opened, calls made, evidence attached, field officers dispatched. Every action is timestamped and attributed.

KEY ELEMENTS

- Status banner with headline + recommended action
- Activity timeline • who did what, when, with what evidence
- Related-cases panel for institutional memory
- One-click "Mark resolved" with mandatory closure note
- Severity, target close date, and assigned officer at a glance

CASE DETAIL • ACTIVITY-FIRST

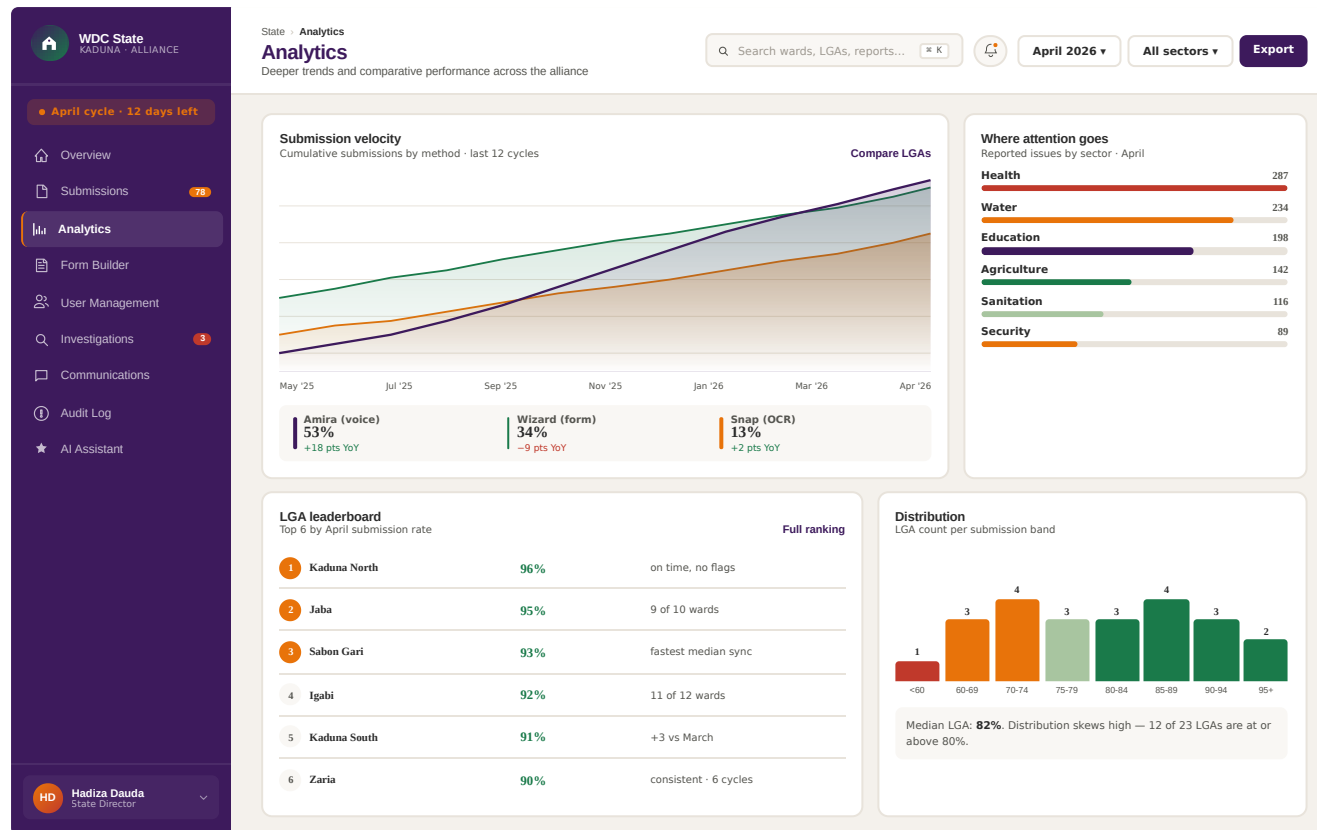

6

ANALYTICS

Trends, leaderboards, and distribution

Operational counts answer "what?" Analytics answers "what's changing, who's rising, where's the median?" — the questions that drive resourcing decisions.

Trends & distribution

6.1 Analytics · Trends & distribution

Going beyond operational counts. Submission velocity by method (a stacked area chart shows Amira growing at the expense of Wizard over the last twelve cycles), sector mix showing where attention is going (Health and Water always top), an LGA leaderboard, and a histogram of LGA performance distribution.

KEY ELEMENTS

- Stacked area chart: submission method evolution over 12 cycles
- Year-over-year deltas per method (+18 for Amira, -9 for Wizard)
- Sector breakdown · where issues are being reported
- LGA leaderboard with podium for top three
- Performance distribution histogram with median callout

ANALYTICAL · PATTERN-FINDING

7

COMMUNICATIONS

SUBJECT

Circular #04/2026 · Updated PWD attendance reporting

MESSAGE

Dear LGA Coordinator,

From the May 2026 reporting cycle onwards, the PWD attendance section of the Monthly Ward Report will require disaggregation by category (mobility, vision, hearing, cognitive, other) in addition to the existing total count.

The updated form (v4.3) is now available in Form Builder and will auto-deploy on 1 May 2026. Secretaries do not need to take any action — their wizard and Amira flows have been updated automatically.

Thank you for your continued service.

7.1 Communications · Broadcast composer

State-level communication is one-to-many and audit-logged. The composer lets the Director pick an audience (all coordinators, selected LGAs, or all secretaries), pick channels (in-app, email, SMS), and write or template the message. The right rail previews exactly what coordinators see in their app and lists the last five broadcasts with read counts.

KEY ELEMENTS

- Three audience scopes with live recipient counts
- Multi-channel delivery in one send
- Hausa-translation in one click
- Mobile preview matches what coordinators actually see
- Per-broadcast read tracking · acknowledgement evidence

OUTBOUND · AUDIT-LOGGED BROADCASTS

★ AI Assistant

HADIZA · 09:41

Which LGAs are at risk of falling below 70% submission this cycle, and what's driving it?

WDC ASSISTANT · 09:41

Four LGAs are currently below the 70% threshold for the April cycle. I've ranked them by risk based on three signals: **current rate**, **trend over the last six cycles**, and **known operational context**.

LGA	RATE	TREND	LIKELY DRIVER
Kagarko	58%	↓↓↓	Three consecutive cycles trailing
Birnin Gwari	62%	↓	Coordinator on extended leave
Lere	64%	↓	Connectivity in northern wards
Kachia	67%	↑	Recovering — new coordinator

RECOMMENDATION
Open a formal investigation for **Kagarko** — its three-cycle trailing pattern matches the late-2024 Lere case before LGA leadership intervention. For Birnin Gwari, consider routing the cycle through a deputy coordinator until the lead returns.

Open Kagarko Investigation Drill into Birnin Gwari Export to PDF

👍 📄 Copy Source: Submissions DB · 255 wards · April 2026

CAPABILITIES
What you can ask

- Data analysis**
Submission rates, attendance trends, sector breakdowns.
- Insights**
Surface what's changed, what's unusual, what to act on.
- Trends**
Compare cycles, LGAs, wards, or sectors over any window.
- Recommendations**
Suggested next steps, escalations, and resource shifts.
- Open questions**
Ask anything about the system data — in plain English.

RECENT

- Compare LGA performance
- Why is Kagarko trailing?
- Top issues in April reports
- PWD attendance trend

Ask about trends, anomalies, individual LGAs, or specific wards...

HD Hadiza Dauda
State Director

8.1 AI Assistant · Conversational analysis

A full conversation surface, not a sidebar widget. Ask in plain English; the assistant returns prose plus structured data (inline tables), a clear recommendation block, and action buttons that drop you straight into the right place — opening an investigation, drilling into an LGA, or exporting the analysis. The right rail explains capabilities and offers recent prompts.

KEY ELEMENTS

- Natural-language Q&A grounded in live system data
- Structured responses: prose + table + recommendation + actions
- Source provenance shown beneath every reply
- Capabilities panel: Analysis, Insights, Trends, Recommendations
- Conversation history searchable and exportable

AI · DECISION-SUPPORT, NOT CHAT

The platform's memory

Every action a Director, Coordinator, or system process takes is recorded immutably. This is what lets the alliance answer "who did what, when?" with cryptographic confidence.

24 Apr · 15:33	A. Bello	Reassigned 4 wards to new coordinator	Lere LGA	SUCCESS
24 Apr · 09:00	System	Cycle reminder broadcast · 7-day notice	23 coordinators	SUCCESS

9.1 Audit Log · Sealed history

Every state-level action — sign-ins, form edits, broadcasts, secretary assignments, investigation events — is recorded immutably. The integrity banner up top confirms the log is sealed and verified; the table below is filterable, exportable, and the export is itself signed. This is the layer that lets the alliance withstand external audit.

KEY ELEMENTS

- Immutable log · cryptographic integrity verification
- Includes failed attempts (e.g. OTP timeouts)
- System actions tagged distinctly from human actions
- Sealed CSV export for external auditors
- Result column: success, fail, or flag — colour-coded

SETTINGS

Quietly configurable

Account, language, time zone, 2FA, landing page, retention. Visited rarely, designed accordingly.

Profile & preferences

The screenshot shows the 'Settings' page for a user named Hadiza Dauda, who is the State Alliance Director for Kaduna State WDC. The page is divided into a left sidebar, a top navigation bar, and a main content area.

Left Sidebar: Contains navigation links for Overview, Submissions (78), Analytics, Form Builder, User Management (active), Investigations (3), Communications, Audit Log, and AI Assistant.

Top Navigation Bar: Shows 'State · Settings', 'Settings' (Account, preferences, and platform configuration), a search bar for wards, LGAs, reports, and a user profile icon.

Main Content Area:

- Profile Card:** Displays the user's profile picture (HD), name (Hadiza Dauda), title (State Alliance Director · Kaduna State WDC), email (h.dauda@kdsg.gov.ng), and active status (Active since January 2024 · 28 cycles overseen). A 'Change avatar' button is present.
- Stats Cards:** Four cards showing key metrics: LGAS OVERSEEN (23, all of Kaduna), CYCLES OVERSEEN (28, since Jan 2024), AVG STATE COMPLIANCE (74%, +12 since start), and INVESTIGATIONS CLOSED (44, of 47 lifetime).
- Preferences Table:** A table with settings for Display name, Display language, Time zone, Email digest, Two-factor authentication, and Default landing page, each with an 'Edit' link.

Preferences	
Display name	Hadiza Dauda Edit
Display language	English Edit
Time zone	Africa/Lagos · WAT Edit
Email digest	Daily · 07:00 Edit
Two-factor authentication	On · authenticator app + backup codes Edit
Default landing page	Overview Edit

10.1 Settings · Profile & preferences

Personal account settings live in a sub-navigated settings area. Profile card up top, lifetime impact stats below (LGAs overseen, cycles, average state compliance, investigations closed), then preferences — display name, language, time zone, digest cadence, 2FA status, default landing page. Restrained — most settings are visited rarely.

KEY ELEMENTS

- Sub-nav for Profile, Security, Cycle config, API, Retention, Theme, About
- Lifetime stats reframe settings as personal-impact dashboard
- 2FA status visible inline · always one click from rotation
- Default landing page preference for personal workflow

ACCOUNT · QUIETLY CONFIGURABLE
